# THE ULFHEDNAR'S

"The Ulfhednar's (pronounced Ulf-heth-nar) were a group of Viking warriors. They wore wolf skin, and their own skin was black-died. Like the Berserkers, they performed chants and ritual prior to battle to get in a "Berserker Rage". Through adrenaline they became much stronger and faster, became immune to pain, and bled less."

- Snorre Sturlason "Ynglinga Saga"

## ABOUT US

Ulfhednar AS is a Norwegian family owned company situated in the middle of the wolf land. We are developing equipment, clothing and weapons parts for LE, military, hunting, long range and shooting sports in general. Our harsh Arctic climate makes us set extremely strict requirements for the materials used in our products. The same goes to our subcontractors. ULFHEDNAR® is a registered brand.

Hunting, outdoor activities and shooting sports stands strong among the Norwegians. Our users requires high quality equipment and good workability. Cold winters, wet falls and hot summers require a special set of equipment. Ulfhednar is just that!

\* We use 1000D Cordura® special made according to our spec with water repelent surface on the outside and water resistant waxing on the inside.

VH-Tex™

\* This is our own developed 600D water repelent material, developed by Ulfhednar for the ultimate performance under all conditions. Tested in real life for many years.

YKK

\* We use YKK® zippers on abslutely all of our products, because it's the best!

VH-Web™

\* Our famous thick, soft, non elastic and extremly strong web. This is designed by us and used on all our products.

\* All buckles, loops, cords and elastics are according to Mil spec and come from the renowned suplier Gerald Schwartz Inc.

# Guncovers, mats and bags

# ULFHEDNAR and the sport

The longrange community is one of the fastest growing branches of our sport.

The emergence of long-range shooting sports in recent years makes it increasingly clear that this sport appeals to many of us. We have always had a solid leg planted in the shooting sport. As an active sports shooter for more than 3 decades, I have seen that the practice of the sport gives a great advantage in the further development of our products. A development that also benefits hunters and professional users.

# Shooting Sling

## **UH303 Shooting Sling, non-elastic web**

Is sling shooting a forgotten art? We believe it is an important basic skill. But to master any skill you do need the right tools! Our shooting sling is designed to shoot and take recoil the same way as if you shoot with a bipod. This is to make sure the POI don't change when switching between the various aids. The sling is easily tightened and loosened using a QR spring loaded cam buckle. When done using the sling it removes from arm in only a fraction of a second with a snap buckle.

**Did you know that a rifle mounted sling also can give good support of the rifle and the shooter when used shooting from a tripod, barricade or similar? See more on this and get other helpful tips from our videos on our YouTube-channel!**

# Miragecover Silencer Mk III

We hereby introduce the new Miragecover for Silencer MK3, a new and improved model. The big visible change compared to Mk1 is that the cord, for tightening the cover to the silencer, has been removed and replaced with straps. But the big changes from Mk2 is inside... Kevlar® is replaced with a new special insulating glass-fiber fabric. The miragecover can now withstand heat up to 600° C!!

It is covered with Cordura® and has a soft feel to it. It muffle sound when hitting branches in the woods during the hunt or similar, it reduces heat signature (important for tactical users), while it at the same time covers for heat and mirage in line of sight when shooting.

It is universal, covers up to Ø60 mm diameter and is available in various lengths. (Cordura®, UH-Web™)

**UH140-MK3 Miragecover Silencer Std (230 mm)**

**UH141-MK3 Miragecover Silencer Short (150 mm)**
